

INVITE

The (Im)possibilities of AI in Preventing and Resolving Disputes

We are pleased to invite you to the GCN Think Tank session on September 18 at 3:30 PM, addressing a highly topical subject:

The (Im)possibilities of AI in Preventing and Resolving Disputes

Keynote: Prof. Gijs van Dijck

Gijs is Professor of Private Law and Head of the Maastricht Law and Tech Lab, an interdisciplinary team of legal scholars and computer scientists who leverage AI to better understand and apply legal concepts. His research focuses primarily on liability law, contract law, and technology law. In his keynote, he will share surprising insights on the (im)possibilities of AI in preventing and resolving disputes — both now and in the future.

There will be ample opportunity for discussion and questions.

Additionally, during this afternoon session, we will present the key findings from the GCN Dispute Resolution Survey 2025, highlighting the most notable conclusions.

Programme:

| | |
|---------|------------------------|
| 3:30 PM | Reception |
| 4:00 PM | Start of the programme |
| 5:15 PM | Networking drinks |
| 6:15 PM | End of event |

The event will take place at the beautiful offices of Lexence, Amstelveenseweg 500, 1081 KL Amsterdam. Parking is available in the building's parking garage.

We look forward to welcoming you!

The GCN Team
